Reason for Allowance

The prior art reference of records (USP. 5,596,265) shows a power transistor (MP2), a first transistor (MP6) and a second transistor (MD2). The prior art reference or records fails to teach or suggest a third transistor having a control electrode connected to the first electrode of the power transistor, a second electrode connected to the control electrode of the second transistor as called for in claim 3. Therefore, claims 3-7 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
